

Component Credit Value:	2
Component Level:	One
Component Guided Learning Hours:	18
Ofqual Component Reference No:	H/617/1367
Component Review Date:	31/07/2022
Component Sector:	7.2 Warehousing and Distribution

Component Summary

The purpose of this component is to support a learner's understanding of legislation which fundamentally influences transport and logistic operations. Learners will investigate legislation which relate to different aspects of transport and logistics operations and how each piece of legislation influences operational activities and procedures.

The aim of this component is, therefore, to give learners an introduction to transport and logistics legislation where the focus is on impact and response.

Standards

This component has **3** standards

1	Know legislation which has an impact on transport and logistic operations
2	Know legislation which has an impact on transport operations
3	Know legislation which has an impact on logistic operations

It is expected that before the component is delivered, the Tutor/Assessor will have read the Qualification Handbook to ensure all conditions regarding Rules of Combination, delivery, assessment and internal quality assurance are fulfilled.

Summary of Assessment

This component may be assessed through:

1) an internally set, internally marked and externally verified portfolio of evidence. The information on the following pages details what the learner must successfully complete to achieve the component. Knowledge that must be demonstrated by the learner is highlighted in purple and any associated assessment requirements have been provided. Assessment verbs are displayed in *italics* and expectations for these at each level, along with information on different assessment methods, are available in 'A Guide to Assessing AIM Awards Qualifications' on the AIM Awards website (www.aimawards.org.uk).

This document has been designed to be used as a Record of Learner Achievement Form; Assessors must make it clear to Internal and External Verifiers where achievement of each standard has been evidenced. Once the work has been marked and signed off as meeting the standards by the Assessor, final feedback should be provided to the learner.

Or

2) an externally set, externally marked online Multiple Choice Question (MCQ) exam. The online multiple choice exam must be invigilated by an AIM approved invigilator. Further information on our requirements is detailed in the qualification handbook.

Where a component may be assessed through either portfolio of evidence, or an externally set, externally marked MCQ exam, the centre must choose one of these assessment methods for the assessment of the component.

It is expected that before the component is delivered, the Tutor/Assessor will have read the Qualification Handbook to ensure all conditions regarding Rules of Combination, delivery, assessment and internal quality assurance are fulfilled.

1 The learner will know legislation which has an impact on transport and logistic operations

The learner must know:		Assessment Requirements		Evidence Location
1.a	What is meant by the term 'legislation'	Learners must <i>define</i> the term 'legislation'.	The following assessment methods can be used in the assessment of this standard: <ul style="list-style-type: none"> • Written assignments/essays • Report • Group discussion • Professional discussion This list is not exhaustive and other appropriate assessment methods may be used.	
1.b	Legislation which has an impact on transport and logistic operations	Learners must <i>outline</i> a minimum of two pieces of legislation which impact on transport and logistics operations.		
1.c	The impact of legislation on transport and logistic operations	Learners must outline a minimum of two ways in which a minimum of two pieces of legislation impacts transport and logistic operations.		

It is expected that before the component is delivered, the Tutor/Assessor will have read the Qualification Handbook to ensure all conditions regarding Rules of Combination, delivery, assessment and internal quality assurance are fulfilled.

1.d	How transport and logistic businesses can respond to the impact of legislation on transport and logistic operations	Learners must <i>outline</i> a minimum of two ways in which transport and logistic businesses can respond to a minimum of two pieces of legislation which have an impact on transport and logistic operations.

It is expected that before the component is delivered, the Tutor/Assessor will have read the Qualification Handbook to ensure all conditions regarding Rules of Combination, delivery, assessment and internal quality assurance are fulfilled.

2 The learner will know legislation which has an impact on transport operations

The learner must know:		Assessment Requirements		Evidence Location
2.a	Legislation which has an impact on transport operations	Learners must <i>outline</i> a minimum of two pieces of legislation which impact on transport operations.	The following assessment methods can be used in the assessment of this standard: <ul style="list-style-type: none"> • Written assignments/essays • Report • Group discussion • Professional discussion This list is not exhaustive and other appropriate assessment methods may be used.	
2.b	The impact of legislation on transport operations	Learners must <i>outline</i> a minimum of two ways in which a minimum of two pieces of legislation impacts transport operations.		
2.c	How transport businesses can respond to the impact of legislation on transport operations	Learners must <i>outline</i> a minimum of two ways in which transport businesses can respond to a minimum of two pieces of legislation which have an impact on transport operations.		

It is expected that before the component is delivered, the Tutor/Assessor will have read the Qualification Handbook to ensure all conditions regarding Rules of Combination, delivery, assessment and internal quality assurance are fulfilled.

3 The learner will know legislation which has an impact on logistic operations

The learner must know:		Assessment Requirements	Evidence Location
3.a	Legislation which has an impact on logistic operations	Learners must <i>outline</i> a minimum of two pieces of legislation which impact on logistic operations.	The following assessment methods can be used in the assessment of this standard: <ul style="list-style-type: none"> • Written assignments/essays • Report • Group discussion • Professional discussion This list is not exhaustive and other appropriate assessment methods may be used.
3.b	The impact of legislation on logistic operations	Learners must <i>outline</i> a minimum of two ways in which a minimum of two pieces of legislation impacts logistic operations.	
3.c	How logistic businesses can respond to the impact of legislation on logistic operations	Learners must <i>outline</i> a minimum of two ways in which transport and logistic businesses can respond to a minimum of two pieces of legislation which have an impact on transport and logistic operations.	

It is expected that before the component is delivered, the Tutor/Assessor will have read the Qualification Handbook to ensure all conditions regarding Rules of Combination, delivery, assessment and internal quality assurance are fulfilled.

Final Tutor Feedback (Strengths and Areas for Improvement):

Learner Submission Declaration

I declare that this is an original piece of work and that all of the work is my own unless referenced.

Assessor Declaration

I confirm that this learner's work fully meets all the assessment requirements listed above at the correct level and that any specified evidence requirements have been addressed.

Assessor: _____ **Learner:** _____ **Date:** _____

It is expected that before the component is delivered, the Tutor/Assessor will have read the Qualification Handbook to ensure all conditions regarding Rules of Combination, delivery, assessment and internal quality assurance are fulfilled.

Document Version History

<i>Version Number</i>	<i>Date</i>	<i>Description</i>
2	June 2021	MCQ assessment option available for this component (details on page 2)

It is expected that before the component is delivered, the Tutor/Assessor will have read the Qualification Handbook to ensure all conditions regarding Rules of Combination, delivery, assessment and internal quality assurance are fulfilled.
